You'll be asked to enter a username and password to install the software. The first time you run the program, you'll be asked to select a folder in which to store any files that were deleted during the cleanup. It's a good idea to do this at least once because it makes it easier to see if you've missed any files. What's really great about Easy Cleaner is that, once you've set it up, the cleanup is complete in a matter of minutes. It also cleans system files. This means you can start the process whenever you want without worrying about overlapping activity. And the cleanup is invisible. No pop-ups
